Windows Cleaning Geelong

Let the light shine through with Dust & Shine Window Cleaning!

Dust & Shine offers window cleaning services in and around the Geelong for both residential and commercial properties.

You're probably thinking "why do I need to hire a professional to clean my windows?" Most people don't have access to professional window cleaning equipment and chemicals for their homes or even businesses. If you are a homeowner and you've tried to clean your own windows before, you know that it takes a lot more time and effort than you think it does! If you have tall windows or multiple levels, there may be some areas that you simply cannot easily or safely reach. Our professionals come with the equipment and experience needed to safely and properly clean every window in your home.

Commercial buildings can also present numerous challenges for accessing all of your windows. Dust & Shine guarantees all of our work comes with a Rain Free Guarantee. No, that doesn't mean we guarantee it won't rain! It means that if you find streaks within 48 hours of our services, we will come back out to solve the problem!

Our professional window washers come with professional cleaning chemicals that are biodegradable and safe for humans, pets, upholstery and flooring. We can work around most drapery and window treatments, however we will inform you in advance if we feel we cannot so we can come up with a solution.

What is included with our window cleaning services? We make sure that all windows and sills are cleaned, inside and out, bugs and dirt removed, screens removed and cleaned as necessary, and your windows left sparkling clean!

Why is it important to have your windows cleaned? Believe it or not, not cleaning your windows can actually damage them in the long run. Windows are not simply made of glass, but multiple layers that help protect your home or business from UV rays, heat and other elements. When contaminants such as dirt and bird droppings stay on the window surface for too long, they can cause damage to the window that is irreversible. By having your windows regularly

cleaned, you can prevent this damage.

Clean windows allow you to have an unimpeded view both night and day, meaning better visibility and safety. Having your windows regularly cleaned can also prevent any damage to the seals around your windows and increase or maintain their efficiency. Damaged windows can have issues with condensation or fogging, leading to having to replace your windows. Our professionals will also alert you to any potential safety problems such as windows that have been painted shut or have major issues so that you can address them before they cause a problem. Clean windows also increase your curb appeal, can help maintain your property value, and attract customers or clients to your commercial property.

Maintaining your clean windows is important too! We offer membership plans that are right for your home or business so that you have clean windows year round. For homes, we recommend having your windows cleaned at least twice a year, and at least monthly for most businesses. This ensures your windows not only look great, but the risk of permanent damage from contaminants is minimized.

Window Cleaning Geelong VIC | Dust & Shine Highway Sponsor
Dust & Shine offers our window cleaning services in the Geelong area year round, with the exception of days with major rain or wind. We know

that keeping your windows clean year round is important and therefore we keep going in every season.

We are fully insured for all of the work we do. This means that there is no risk to you having Dust & Shine professionals clean your windows. It also means that you don't have to be the one climbing the ladder, or have an employee attempt to clean your windows and have an accident.

If you're not sure you can pay for the cleaning up front, the great news is that we offer payment plans! You can apply for installment payment online in a few simple steps.
